

my name is george c mullins my amateur call sign is kc8qww i am a technician i support ncvec petitions RM-10870 and RM-10787 there is a lot of generals and advanceds and extras out in the amateur radio world that would try to sway the fcc to keep the morse code requirements for the hf exams so that people like me who cant pass the morse code requirements for hf frequency they dont want any new hams on the hf bands they say that it will over crowd the hf bands they dont care about morse code they just want to make harder for people to get on hf bands and for people to get a ham license i hope that the fcc dont let this happen to us a lot of countrys have drop the morse code requirements for hf exams i think that the hf bands should be for all people that obeys all the fcc rules and be polite and courtesy to all ham operators regardless if they can copy morse code or not these hams that copy morse code think that they are better then us technician bcause we cant copy morse code they are going to persuade the fcc to keep morse code requirements so we cant get on the hf bands we have the national conference of volunteer of examiner coordinators and the arrl on our side and we need the fcc help to make this happen with out your help we dont stand a chance from geting on hf bands so wll you help us please thank you very much.
